3D Part

The technical drawing illustrates a mechanical component with the following dimensions and features:

- Sectional FV (Front View):** Shows a stepped profile. The total width is 74. The base has a thickness of 14. The top section has a width of 28. The left side has a width of 16. The right side has a width of 10. The top section is divided into two parts, each 10 units wide, with a 14-unit gap between them.
- LHSV (Left Hand Side View):** Shows the profile from the left. The total width is 37. The base has a thickness of 4. The top section has a width of 14. The right side has a width of 5. The top section is divided into two parts, each 10 units wide, with a 14-unit gap between them.
- TV (Top View):** Shows the top of the component. The total width is 74. The total depth is 37. The left side has a width of 16. The right side has a width of 10. The top section has a width of 28. The bottom section has a width of 14. The top section is divided into two parts, each 10 units wide, with a 14-unit gap between them. A circular hole with a diameter of $\varnothing 7$ is located in the right side, 15 units from the right edge. A rectangular slot with a width of 13 and a depth of 10 is located in the left side. The section line A-A is indicated.
