

Structure Practice Problems

1. Write a program to create a structure for representing a date (day, month, year). Input a date and display it in the format "DD-MM-YYYY".
 - Sample Input:
Day: 12, Month: 07, Year: 2023
 - Sample Output:
12-07-2023
2. Write a program to define a structure to store the details of a car (make, model, year, price). Input the data for multiple cars and display the car with the highest price.
 - Sample Input:
Car 1: Make: Toyota, Model: Corolla, Year: 2020, Price: 2000000
Car 2: Make: Honda, Model: Civic, Year: 2021, Price: 3000000
 - Sample Output:
The car with the highest price is Honda Civic priced at 3000000
3. Write a program to define a structure for a 3D box (length, width, height). Implement functions to calculate the volume and surface area of the box. Additionally, create a function to compare two boxes and determine which one has a larger volume.
 - Sample Input:
Box 1: Length: 5, Width: 6, Height: 7
Box 2: Length: 4, Width: 5, Height: 8
 - Sample Output:
Volume of Box 1: 210, Surface Area of Box 1: 204
Volume of Box 2: 160, Surface Area of Box 2: 190
Box 1 has a larger volume.
4. Write a program to define a structure for a bank account, which includes the account holder's name, account number, balance, and account type. Implement functions to deposit and withdraw money, ensuring that the balance cannot be negative. Handle errors for insufficient balance during withdrawals.
 - Sample Input:
Account Holder: John Doe, Account Number: 12345, Initial Balance: 1000, Account Type: Savings
Deposit: 500, Withdraw: 200, Withdraw: 1500
 - Sample Output:
Account Details:
Name: John Doe
Account Number: 12345
Account Type: Savings

Balance: 1300

Error: Insufficient Balance for withdrawal of 1500

5. Write a program to define a structure representing a student's marks in five subjects. Implement a function to compute the highest marks scored in any subject across all students. Allow input for multiple students and display the subject with the highest marks along with the student who achieved it.
 - Sample Input:
Student 1: John, Marks: 80, 90, 75, 85, 70
Student 2: Jane, Marks: 85, 95, 88, 90, 80
 - Sample Output:
Highest Marks: 95 in Subject 2 (Jane)
