

Term Paper

Introduction, Rationale, Methodology & Citation, Research Question

Introduction & Rationale

- In the Introduction, write the overall background of the topic. Also, do not forget to mention why this topic is relatable to the current time.
- For the Rationale segment, write why your group has chosen this topic. The reason might be inspired from a personal experience, or perhaps due to growing concern about it in the modern world
- Word limit: 150-180 (for each section)

Methodology

- **Method:** Which method was used to conduct the study (Qualitative/Quantitative/Mixed)
- **Tools:** Questionnaire, Online video call platforms such as Zoom, Google Meet
- In terms of the questionnaire, write which platform (preferably Google Form) was used to conduct the survey, how many and what type (yes/no, MCQ, Likert scale, descriptive) of questions were there
- In terms of video call, write which platform (Zoom/ Google Meet) was used, how many and what type (structured/semi-structured) of interview questions were there
- **Sampling Method:** Write how many and what type of (students or participants from a specific profession) samples were there, why they were chosen. The sample number can be 5-10, in case of interview the number can be 1-3.
- Word limit: 180-200

Citation

- **In-text citation:** Referring to suitable quotes from scholarly works related to the term paper. You can either quote directly or paraphrase it. Please note that, you have to acknowledge the original source using *APA 7* style
- **References:** At the end of the main paper, you have to give references of all sources used following *APA 7*.
- Please note that, for the “Findings from the Authors” section, you can use either 2 scholarly articles/1 scholarly and 1 newspaper articles. There **MUST** be at least 1 scholarly article

APA 7 style citation

Research Questions vs Questionnaire questions

- A research question is a clear question to which the research aims to respond. It is at the heart of systematic study and aids in defining a clear route for the research process. A research question is the heart of every research endeavour, study, or literature review.
- A questionnaire is a type of research instrument that consists of a collection of questions used to collect data from respondents in a survey or statistical study. A typical research questionnaire has a combination of closed-ended and open-ended questions. It is a research tool that consists of a collection of standardized questions used to collect statistically meaningful information from one or more respondents on a certain topic. It might be a written interview with standardized questions that can be addressed in person, over the phone, by mail, or even online.

Examples

Research questions: (might be 1-3 at your level)

- a) Do ELT programs in Bangladeshi public universities contribute to self-regulated learning of the students aspiring to be university teachers?
- b) What are the probable reasons inhibiting proper self-regulated learning of the future university teachers?
