

LAB REPORT

COURSE INFORMATION

- ❖ Course Code:
 - ❖ Course Title:
 - ❖ Experiment No:
 - ❖ Experiment Name:
-

SUBMITTED TO

- ❖
 - ❖ Department of
 - ❖ East West University
-

SUBMITTED BY

- ❖ Student Name :
- ❖ ID :
- ❖ Section :
- ❖ Department :

East West University

Date of submission:

Calculation:

$$\mu = \frac{\sin i}{\sin r} = \frac{\sin \left(\frac{\delta_m + \angle A}{2} \right)}{\sin \left(\frac{\angle A}{2} \right)} = \dots\dots\dots = \dots\dots\dots$$

$$\text{Percentage Difference} = \frac{\text{Standard value} - \text{Experimental value}}{\text{Standard value}} \times 100\%$$

Experimental value of refractive index (measured by experiment) =

Standard value of Refractive index = **1.52** (known crown glass)

Percentage difference =
